

ALEX KACHUR

Toronto, ON · 647-510-5343 · alexkachur98@gmail.com · linkedin.com/in/alex-kachur · github.com/AlexKachur98 · alexkachur.com

Software engineering student who builds full-stack web apps with LLM features that do real work: an AI assistant over household finance data, and two sites built for clients in 2026, one live. Three years of QA on Dynamics CRM before moving into development. Available full-time from May 2027.

SKILLS

Languages: JavaScript, TypeScript, Java, C#, Python, SQL (T-SQL, PostgreSQL, Oracle), Kotlin, HTML, CSS

Web and apps: React, Next.js, Node.js, Express, Spring Boot, .NET and WPF (MVVM), Jetpack Compose, Tailwind CSS

AI and data: Anthropic and Gemini APIs, tool calling, ML.NET, Firebase Firestore, Entity Framework Core, Power BI

Testing and delivery: Jest, Selenium, Cypress, test-case design, Jira, Git and GitHub, GitHub Actions, Vercel, Cloudflare Pages, Linux, Claude Code

EXPERIENCE

Freelance Web Developer

2026 to present

Self-employed, Thornhill, ON

- Built and handed off a five-page marketing site for **Uraz Hoops**, a basketball training business (Next.js 16, React 19, Tailwind CSS v4, Resend), live at urazhoops.com, with a handoff guide the owner uses to update it himself.
- Designed and built a customer review funnel for **Think Smarter Insurance**, an Ontario brokerage: single-file HTML, CSS and JavaScript with no build step, on Cloudflare Pages, with private feedback routed by email and an owner settings panel. Demo live, go-live pending.
- Researched review-gating rules (Google policy, Competition Act, RIBO Guidance 006), documented the risk for the client, and shipped a compliance toggle so the flow can change without a developer.

QA Tester

Jan 2022 to Jan 2025

360 Plus IT Consulting, Thornhill, ON

- Wrote and ran 50+ test cases for Microsoft Dynamics CRM and Power Apps workflows against acceptance criteria, reducing post-release defects.
- Wrote SQL queries to validate data across tables, improving reporting accuracy by 15%; logged and tracked 30+ defects in Jira and worked with developers on root cause.
- Took part in stand-ups, sprint planning and retrospectives, and refined user stories and acceptance criteria with the product owner.

Manager

Aug 2019 to Jan 2022

IOAL Distributing, Mississauga, ON

- Ran daily warehouse operations (inventory control, order fulfilment, vendor and client service), supervised staff, and cut order processing time by 20%.

PROJECTS

SplitRoof AI assistant

Sep 2026 to present

Team project (COMP 231). React, Node.js, Express, Firebase, Anthropic API (Claude Haiku 4.5), Jest.

github.com/AlexKachur98/splitroof-assistant-spike

- Own the assistant for a shared-household expense app: a read-only agent that answers "who owes what this month" from the household's own data through three typed tools (getBalance, getCategorySpend, getBudgetStatus). The model never does the arithmetic itself.
- Built the spike first: three tool functions with 17 passing Jest tests before wiring in the model. Also maintain the project documentation and keep the team on schedule.

Family Feud with an LLM judge

2025

Team project. JavaScript, Gemini API

- Built a playable Family Feud where a Gemini model judged semantic matches, so "storm" scored when the answer was "rain". Retired after the course over hosting cost. The lesson carried forward: give the model one narrow, testable job.

EDUCATION

Software Engineering Technology, Advanced Diploma (Co-op)

Jan 2025 to Apr 2027 (expected)

Centennial College, Toronto, ON. GPA 4.4 / 4.5

- Coursework: Data Structures and Algorithms, Software Security, Spring Boot, Data Warehousing and Predictive Analytics, API Engineering and Cloud Computing.
- Peer Mentor since Jan 2025 (first-year coursework and study sessions). Team captain of a competitive gaming team since 2014.
